ABOUT US

***NIXON ENGINEERING** is a well-established company, under the able leadership of Mr. Antony. L at 05.05.2005. We are an automotive parts manufacturing company and certified by IATF 16949:2016 Quality Management Systems. The company is equipped with good infrastructure which is required for producing quality products. The company also has adequate technical and non-technical personnel for the smooth functioning of its manufacturing unit.*

OUR VISION

To Be A Great Leader In The Industrial Engineering & Manufacturing

OUR MISSION

To Innovate & Develop High Performance In Engineering thereby producing quality product

QUALITY POLICY

NIXON ENGINEERING Quality policy is to always endeavor to produce and supply sheet metal components with consistent quality and with a commitment to meet customer expectations on Quality, Cost, and Delivery at all times

Our Vision is to be the best and demanding ancillary in the automotive sheet metal field through continuous improvement

INDUSTRY SEGMENTS

1. Automotive & Transportation
2. Engineering Design & Services
3. Agriculture Equipments
4. Machinery & Equipments
5. Steel & Construction
6. Energy & Power Industries
7. Aero Industries
8. Heavy Industries
9. Manpower services

ENGINEERING DESIGN

We provide advanced engineering solutions for designing sub-assemblies and large assemblies with a strong focus on core engineering. With complete design engineering capabilities from product and process design through initial production, we deliver cost-effective solutions.

PRESS TOOL

In order to meet the individual requirements of the clients, we offer a wide array of Press Tool that are durable in nature and are performance-based. Our entire product range is quality assured and is delivered in varied dimensions. Press Tool is offered with standard configurations. We manufacture stage tools, progressive tools, compound tools, draw tools, Jigs, checking fixtures, Assembly fixtures, welding fixtures, etc.

PRESS COMPONENTS

We offer high-quality Precise Sheet metal Parts which are widely used in various industries for their respective industrial purposes. We manufacture stamping components from the utmost grade of raw materials to provide durability and strength to the finished product.

ASSEMBLY PARTS

From start to finish, We can provide complete product assembly or even custom machine assembly. By combining our fabrication, welding, and machine shops, we can build truly unique production parts and equipment. With all steps of the manufacturing process under one roof, we can provide a cost-effective finished product with special attention to quality, production deadlines, and the feasibility of end-use.

MACHINED COMPONENTS

We are manufacturing high-precision machined components for the automotive industry, medical equipment, and various other industries. We have a quality system to ensure the best quality and management to ensure daily supply of parts

HEAVY FABRICATION

we are offering a wide range of Heavy Fabrication service to our precious clients. Our professionals work hard to provide this fabrication service within the promised time. Offered services are highly demanded by the clients for their accuracy and reliability.
